

```
public String toString() {  
    ListNode<E> nodeRef = head;  
    StringBuilder result = new StringBuilder();  
    while( nodeRef != null ) {  
        result.append( nodeRef.getData() );  
        if ( nodeRef.getNext() != null ) {  
            result.append( " ==> " );  
        }  
        nodeRef = nodeRef.getNext();  
    }  
    return result.toString();  
}
```
